

Front-End Web Development Practical Test

Theme: **Green Mobility Delhi – Eco-Friendly Transport Awareness Website**

Objective

To design and develop a responsive, interactive, and visually appealing single page website promoting eco-friendly transport options in Delhi. Students will demonstrate their front-end development skills using HTML, CSS, and JavaScript.

Project Requirements

Your website should include the following sections and features:

- 1. Home Page – Banner, introduction about green mobility and pollution awareness.
- 2. Gallery Page – Images or infographics related to sustainable transport (EVs, Metro, Cycling, etc.).
- 3. About Page – Information about environmental issues and Delhi's air pollution.
- 4. Contact Page – Simple contact or feedback form with JavaScript validation.
- 5. JavaScript Feature – Add one interactive feature such as: Carbon Footprint Calculator, Image Slider, or Scroll Animation.

Technical Guidelines

- Use only HTML5, CSS3, and JavaScript (no backend).
- Responsive design is mandatory (desktop and mobile view).
- Frameworks like Bootstrap are allowed but optional.
- Folder structure must include index.html, style.css, script.js, and assets/ folder.
- Code should be well-commented and neatly organized.

Submission Rules

- Project Duration: 1 week from the date of assignment.
- Submission Format: Zip file of the project folder.
- Optional: Include a short (1–2 minute) video demo of the website.

Evaluation Criteria

Criteria	Marks
UI/UX Design	25
Functionality & Interactivity	25
Code Structure & Responsiveness	25
Creativity & Theme Relevance	25
Total	100

Submission Date: 24th September 2025.
